## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the independent second spring of claim 1 must be shown (in the drawings each of the first and second springs is shown with a damper) or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It appears that the first spring is independent and not the second spring since the second spring is provided with a damper between it and the first mass.

4. Claims 2 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, "spring/damper element" is vague.

Art Unit: 3683

5. Claims 2 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, “may be” renders the claim vague and should be replaced with “is”.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

7. Claims 1-5 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Sick et al. (US 6213681).

Sick et al. disclose a spring/mass vibratory force coupler with variable damping and variable spring stiffness for coupling masses to a reference mass (see Fig. 2), including a first mass 3 coupled to a second mass 1 via first spring 2b and a second spring 2b arranged in parallel,

Art Unit: 3683

a damper 4 arranged between the second spring and the first mass wherein a damping function of the damper may be varied based on an application of a voltage to an ER or MR fluid contained therein.

Re claim 2, see col. 5 lines 65-67, where Sick et al. explains that a “corresponding damper system” associated with the “upper mass” is activated to address different types of soils.

Re claim 3, see col. 4 line 66 for electroviscous damper.

Re claim 4, It would have been obvious to one of ordinary skill in the art to which the invention pertains at the time the invention was made to have provided yet further “corresponding damper systems” in order to achieve “suitable eigenforms” (see col. 5 line 67).

Re claim 5, see col. 5 lines 65-67.

Re claim 8, Sick et al.’s device is a vibratory driver.

### ***Response to Arguments***

8. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hodgson et al., Patten, Kimura, Carlson, and Agnihotri et al. disclose related devices.

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
